DETAILED ACTION

Election/Restrictions

Applicant's election of the invention of Species I (claims 1-16) in the reply filed on June 23, 2005 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)). Accordingly, Claims 17-28 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species.

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Information Disclosure Statement

The information disclosure statement filed July 15, 2003 has been made of record and the references cited therein have been considered by the examiner.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

⁽b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Application/Control Number: 10/621,086

Art Unit: 3739

Claims 1 and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Snoke et al. (U.S. Patent No. 6,234,958).

In regard to claim 1, Snoke et al. teach a medical device introduction system 20 comprised of an introducer 30 that can be used to introduce an endoscope (see Figures 1-4). Introducer 30 includes a plurality of lumens 34-38 extending through the introducer body 31 for the passage of other tubular members (see Figures 1-4). As broadly as claimed, at least one of the lumens 34-38 has a predetermined degree of flexibility and length. Snoke et al. also teach a working channel device 80 that is preferably steerable (see col. 5, lines 60-65). In regard to claim 10, Snoke et al. teach an inflatable portion 43 located at the middle of introducer body 31 for the purpose of providing a lock for the introducer 30 to hold it in position (see Figures 2-4 and col. 7, lines 55-65).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claim 12 is rejected under 35 U.S.C. 103(a) as being unpatentable over Snoke et al. (U.S. Patent No. 6,234,958) in view of Japanese Publication No. 2001-258819.

In regard to claim 12, Snoke et al. are silent as to the particulars of an endoscope passed through the insertion device 30. However, Japanese Publication

Application/Control Number: 10/621,086

Art Unit: 3739

1

No. 2001-258819 discloses an endoscope having a drum 12 upon which the insert part 8 of the endoscope is wound that is housed in a carrying case 7 (see Abstract, page 1). Japanese Publication No. 2001-258819 thus demonstrates that endoscopes would around drums and carrying cases for supporting the drums are well known in the art. Accordingly, it would have been obvious for one of ordinary skill in the art at the time the invention was made to provide an endoscope used in the insertion device 30 of Snoke et al. with the drum and carrying case disclosed by Japanese Publication No. 2001-258819.

Allowable Subject Matter

Claims 2-9, 11 and 13-16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Applicant should note the following prior art references: Michels et al., U.S. Patent No. 6,890,295 and Storz, U.S. Patent No. 4,449,532.
